

ClearRoute™2 for Gauging Professionals

Omnicom
Balfour Beatty

ClearRoute™ 2 is a market-leading tool for calculating the clearances between railway vehicles and infrastructure. If you already have gauging and vehicle behaviour knowledge, our two-day professional course provides successful delegates with an industry-recognised qualification.

The ClearRoute™2 for Gauging Professionals course is ideal for those who already have knowledge and experience of railway gauging and have not previously completed a ClearRoute™2 certification.

The two-day course is delivered using a mix of explanations, demonstrations and a series of exercises. This ensures delegates gain plenty of extensive supervised hands-on experience.

Each delegate will undertake a formal assessment and will be presented with a certificate to confirm their competence, along with a CLP file to install in ClearRoute™ 2.

A maximum class size of four ensures each delegate receives a high level of support from the tutor and has access to the appropriate equipment.

What you will learn

- Creating structure profiles using Platform and Sixfoot modules
- ClearRoute™2 functionality
- Importing structure profiles
- Editing profiles saved in local infrastructure databases
- ClearRoute™ 2 infrastructure and vehicles databases
- Using projects in ClearRoute™ 2
- Clearance runs
- Design options
