

Structure Survey Editor™

Training

Omnicom
Balfour Beatty

Structure Survey Editor™ has been designed to assist surveyors with viewing and editing survey data for tunnels, bridges and platforms.

Our interactive course gives delegates an understanding of how to make the best use of the tool and create accurate and useful data for gauging purposes.

Course overview

The Structure Survey Editor™ course is available both online with a live instructor or as a classroom delivered session.

Our online course is delivered in the same interactive way as the classroom-based session. It provides delegates the advantage of professional training without the expense of travelling to our training centre in Raynesway, Derby.

The course provides delegates an understanding of SCO files and how they are used in ClearRoute™2. This is delivered using a mix of explanations and demonstrations combined with a series of exercises.

At the end of the course each delegate will be presented with a certificate to confirm their attendance.

Delegates are also provided with comprehensive course notes to take away for future reference.

We recommend a maximum class size of four to ensure that each delegate receives a high level of support from the tutor and has access to the appropriate equipment.

What you will learn

- Introduction to structure profiles (SCO files)
- Loading profiles
- Editing profiles
- Saving profiles

Logistics

- Both classroom sessions and online courses start each day at 9.30am and finish at 2.30pm
- The course can be delivered from our office in Raynesway, Derby or on-line via our ReadyTech virtual classroom
- If you require the course to be held at an alternative location please contact us for information and prices

Course costs

2024 price per delegate, excluding VAT:

1 delegate	£564
2 or more delegates	£385
